Riverside, CA | (951) 970-7990 | dpower395@gmail.com | [linkedin.com/in/power-dylan/](https://www.linkedin.com/in/power-dylan/) | <https://github.com/dpower395/>

Summary: Full-stack Software Engineer with hands-on experience developing secure, scalable Java backend systems and modern Angular front-ends. Known for identifying and resolving complex security and performance issues. Brings a research background and analytical mindset to software development, with a passion for writing clean, maintainable code and rapidly learning new technologies.

SKILLS

Languages: Java, C#, Python, JavaScript (HTML/CSS), SQL, C/C++

Frameworks & Tools: Angular, Node.js, AWS (ECS, EC2, S3, CloudWatch, CloudFormation), Git/GitHub, Bash, Linux, Veracode, Splunk, Figma

Security & DevOps: Veracode, penetration testing, CI/CD pipelines, Infrastructure as Code (IaC), Agile/Scrum

PROFESSIONAL EXPERIENCE

Charles Schwab, Remote

07/2023 – Present

Software Development Engineer

- Developed and maintained scalable backend APIs and full-stack web applications as part of an agile team, adhering to modern SDLC practices
- Led overhaul of login and authorization workflows across multiple platforms, implementing secure single sign-on (SSO) for internal and external users
- Proactively monitored and remediated application vulnerabilities using Veracode and penetration testing tools, maintaining security scores ≥ 99
- Engineered a high-performance file processing module using a hashmap-based algorithm, reducing runtime by 90% on large datasets
- Collaborated with cross-functional teams—including designers, product owners, and QA—to redesign legacy UIs into responsive Angular frontends based on Figma specifications
- Refactored and optimized complex SQL queries and data insertion logic, contributing to database performance improvements and modernization efforts
- Participated in code reviews, CI/CD pipelines, and deployment workflows to ensure code quality and operational excellence

Amazon Web Services, Seattle, Washington

05/2022 – 08/2022

Software Development Engineer Intern

- Built backend systems to track and analyze customer engagement metrics across AWS product offerings
- Designed and deployed scalable infrastructure using AWS services including ECS, EC2, S3, CloudWatch, and CloudFormation
- Partnered with engineers and product managers in a fully agile environment to refactor services and reduce operational and design costs
- Contributed to infrastructure as code (IaC) efforts, improving deployment automation and consistency

Wildcat Discovery Technologies, San Diego, California

07/2018 – 08/2020

Laboratory Technician

- Performed high-throughput inorganic material synthesis to develop new materials for the advancement of primary and rechargeable batteries

EDUCATION

University of Colorado, Boulder | Boulder, CO

Bachelor of Science, Applied Computer Science, GPA 3.9

May 2023

University of California, San Diego | San Diego, CA

Bachelor of Science, Environmental Chemistry, GPA 3.8

June 2018
